Chemical Engineering Processes and Products

Cyndet F.18

High alkaline foam cleaner

- Due to the high alkalinity and excellent penetrating ability **CYNDET F-18** removes the most persistent contaminants that can be found in the food industry, such as smoke houses, ovens, containers, lids of kilns, blanchers, smoke soiled ceilings
- **CYNDET-F-18** provides a long-lasting active layer of foam, which attaches to the solid firmly committed to the cleansing the materials. Due to how well **CYNDET F-18** rinses there will be no product residue.
- **Biodegradable.**
- **Phosphate free.**

Where to use

CYNDET F-18 is a concentrated, "Heavy Duty", liquid, highly alkaline, brown-colored detergent with high foaming properties for the thorough cleaning of very heavily contaminated surfaces in the food industry using foam cleaning equipment.

It removes stubborn stains from stainless steel processing equipment in the food industry, conveyors, tanks, silos, heavily polluted floors, baking equipment, etc.

Safe for:

Stainless steel, porcelain, ceramic tiles, plastics, ceramics, concrete.
For painted surfaces, test it first.

Packing

Can of 25 kg

How to use

The concentration of the solution is dependent on the desired degree of foam, as well as the dirtiness of the surfaces to be cleaned.

General:

1 - 10% **CYNDET F-18** by volume in water. Temperature: 5 - 50 ° C.

REMINDER: Rinse thoroughly with clean water!

If the surfaces to be cleaned with **CYNDET F-18** are not adequately clean, the application of a gel cleaner technology solution can provide help.

Properties

physical aspect	: Brown colored liquid
pH at 5% by volume in water	: 13.5 ± 0.5
odor	: specific
Solubility in water	: fully

Safety

The safety information of this product is mentioned in our Safety Data Sheet (MSDS).
If using cleaning- and/or disinfectant products use always personal protective equipment.

* Only to be used by professional users.

Attention: store above 5 ° C.
