

# INSECT REMOVER

## Where to use

High alkaline product for the removal of mosquitoes, flies and other pests, grease and dirt from painted surfaces. Very suitable for the cleaning of two-component lacquers.

## Packing

Box of 2 x 5 liter

## How to use

Apply using high pressure equipment or a steam cleaner. The reaction time, which depends on the contamination, is on average from 1 to 3 minutes. After cleaning, always rinse with water!

## Comments / precautions:

Do not let dry. In order to determine whether the material tolerates the product well, such as alkali sensitive lacquer, aluminum and rubber, always carry out a test in a secluded place.

Temperature: room temperature to 80° C.

Concentration: 0.25% to 4% by volume.

## Properties

physical aspect	: light yellow liquid
pH of 5% solution	: 13.0 ± 0.5
odor	: specific
