

## ROGYFLOC

### Water purification flocculant for pools

- **Rogyfloc** Is highly concentrated and therefore very economical to use.
- **Rogyfloc** Is added shortly before the filter. This is made possible by the rapid flocculation.
- By the Purity of **Rogyfloc** there are no blockages in the pipes.
- By continuously applying **Rogyfloc**, dissolved colloidal and completely dissolved organic contaminants are removed from the swimming water.

#### Where to use

Clear, colorless flocculent, especially designed for impurities present in swimming water to catch in the filter. It also prevents clogging of the filter, so that the periods between filter rinsing can be extended.

#### Packaging

Polycontainer of 20 kg.

#### How to use

If a dosing pump is present, **Rogyfloc** can be added directly to the water.  
General: 0.2 to 1 ml of **Rogyfloc** per m<sup>3</sup> circulated water.

Calculation example:  
Pump capacity liters / hour x 24 (h) x 0.2 ml. If necessary, increase concentration.

#### Prperties

physical aspect	: colorless liquid
pH undiluted	: 4.5
odor	: none
Solubility in water	: completely

#### Safety

The safety information of this product is mentioned in our Safety Data Sheet (MSDS).  
If using cleaning- and/or disinfectant products use always personal protective equipment.

\* Only to be used by professional users.
