

## ALKALINE 800

Degreaser for use in industrial washing machines

- Very effective on different paints, oil, grease, rubber, paint or combinations
- **Alkaline 800** is safe for many types of metal.
- Simple to dose due to it being a liquid.
- **Biodegradable and Phosphatefree**

### Where to use

A highly concentrated alkaline liquid cleaning concentrate for cleaning soiled motor parts and other metals using an industrial washing machine. Removes heavy oils, grease, soil, wax, ink and some un-thickened paints containing resins as well as glues and adhesives.

**Alkaline 800** is safe for many types of metal. In the case of soft metals, like aluminium, adjust the concentration, contact time and the temperature. We always advise to first do a test cleaning in order to determine the right concentration, contact time and temperature.

### Packing

Polycontainer à 25 kg

### How to use

Normal working concentration, dependent on the soil 2-10%  
Working temperature 20°C to 50°C.

At higher temperatures it is advisable to ventilate thoroughly.

### Properties

Physical aspect	: <b>clear liquid</b>
pH 5% solution	: <b>12,5 ± 0,5</b>
Odor	: <b>specific</b>
Solubility in water	: <b>complete</b>

### Safety
