

## POLY-MET

### METALLIZED WAX EMULSION FOR WATER-RESISTANT FLOORS

- **POLY-MET** contains very small suspended molecular metal compounds with acryl-dispersion.
- Maximum non-skid action, film hardness, tread solidity and water resistance.
- Exceptionally fast, wetting and outflowing action.
- Damp or water has no influence on the polish, water pools can be mopped, without emulsifying, affecting or removing the polish.

#### Where to use

**POLY-MET** is a liquid, self-drying and self-polishing, metallized composition with acryl-dispersion hardwax-polish for use on floors with many pedestrians daily. **POLY-MET** is not suitable for wood which is coated with UV varnish

Where to use:

Fashion warehouses, department stores, hospitals, sanatorium, institutions, office buildings, musea, churches, schools, universities, hotels, restaurants, cafés, railroads, airports and navigation.

#### Packaging

Box of 2 x 5kg cans

#### How to use

- A floor without any polish or a floor from which the polish has been removed with a solution of **ROGY-CLEAN** or **ROGY-SOL** must be treated twice.
- More treatments give the floor a beautiful shine and advanced anti-skid properties.
- The best results are acquired if the floor is absolutely clean. Apply a thin layer of polish, which should be properly dry before applying a second layer.
- For daily maintenance use **ROGY-POLISH**. Leaflets are sent on request.

N.B.: **POLY-MET** is not suitable for marble and other porous stones.

#### Properties

Physical aspect	:	<b>white liquid</b>
pH 5%	:	<b>8,5 ± 0,5</b>
Odor	:	<b>wax</b>
Solubility in water	:	<b>complete</b>

#### Safety

The safety information of this product is mentioned in our Safety Data Sheet (MSDS).  
If using cleaning- and/or disinfectant products use always personal protective equipment

\* Only to be used by professional users.
